

# TALKING CLEAN ENERGY ON THE CAMPAIGN TRAIL

## JOBS & ECONOMIC RECOVERY

### KEY MESSAGES TO DELIVER

A strong energy sector builds a strong economy.

In nearly every state, clean energy industries provide steady, well-paying jobs and help reduce greenhouse gas emissions.

Prior to COVID-19 nearly 3.4 million Americans worked in clean energy.

## CLEAN ENERGY

### KEY MESSAGES TO DELIVER

Wind, solar, hydropower, and natural gas are just a few examples of the forms of clean energy that millions of Americans depend on every day.

Clean energy generates reliable power for homes, businesses, schools and more.

Advancing clean energy allows our nation to depend less on foreign oil, reduce emissions and mitigate the impact of climate change.

## 21<sup>st</sup> CENTURY ENERGY

### KEY MESSAGES TO DELIVER

Supporting clean energy technologies and research is key to ensuring the U.S. maintains its competitive edge.

Helping new companies enter the energy market creates more choices and is a win for consumers.

Upgrading our energy infrastructure will strengthen national security and grow the economy.

## CONSERVATION & CLIMATE

### KEY MESSAGES TO DELIVER

Republicans have a long history of environmental stewardship and leadership—from Teddy Roosevelt, to Richard Nixon, to George W. Bush—climate change isn't an issue we should shy away from.

Republicans don't want to debate the science, we are focused on solutions that will create jobs today and conserve the environment for our children.

Republicans are helping address climate change by advancing clean energy sources and using the free market.
